

# Environmental test chamber

Good sealing and uniform temperature distribution

HD-F705

## USE

Test for the need to place a large number of items to be tested at the same time, shorten the total test time of a single product, or perform temperature and humidity stress screening (ESS) of the product, or dynamic test requiring large moving space (eg printer temperature and humidity dynamic printing test) And larger products are suitable for this device.

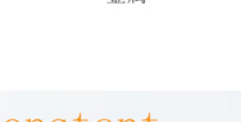

## PRODUCT APPLICABLE OBJECT

PRODUCT APPLICABLE OBJECT

步入式恒温恒湿房适用于整机或大型零部件的低温、高温、  
高低温变化、恒定时热、高低温交变湿热试验等。

## Walk-in constant temperature and humidity chamber

The size and function of the studio can be changed according to the requirements of the user; the block type box is beautiful and generous; the scientific air duct design can meet the needs of different customers.

High temperature

Low temperature

High and low temperature changes

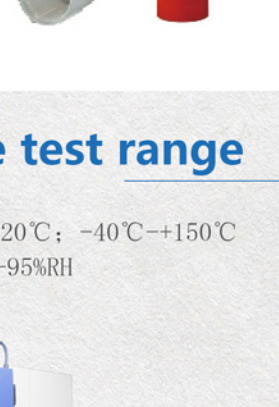

## Size can be customized

As long as you say, we will do it

## Powerful Hardware

Main function accessories adopt industry leading configuration

## Large temperature test range

Temperature Range: 0°C; -10°C; -20°C; -40°C~+150°C  
Humidity Range: 20%~95%RH
